

## Canine Spay / Neuter Package

### Your dog's surgery includes:

- Pre-surgical blood work (see below)\*
- Examination
- Hospitalization
- Pre-operative sedation
- IV catheter and IV fluids
- Induction anesthesia
- General anesthesia (Isoflurane)
- Spay or neuter surgery and supplies
- Post-operative pain medication
- To-go-home pain medication
- E-collar
- Nail trim
- Anesthetic monitoring
  - ECG
  - Blood Pressure
  - Pulse Oximetry
  - End Tidal CO<sub>2</sub>
  - Respiration Rate
  - Body Temperature

### Your dog's surgery does not include:

- Microchip
- Retained deciduous teeth extractions

\* The pre-surgical blood work should preferably be obtained by a technician approximately one week before the scheduled surgery to be certain all values are OK for anesthesia and surgery. A time will be set up for you to have this done by one of our technicians.
