

Feline Spay / Neuter Package

Your cat's surgery includes:

- Pre-surgical blood work (see below)*
- Examination
- Hospitalization
- Injectable anesthesia and oxygen
- Anesthetic monitoring
 - ECG
 - Blood Pressure
 - Pulse Oximetry
 - End Tidal CO₂
 - Respiration Rate
 - Body Temperature
- Spay or neuter surgery and supplies
- Post-operative pain medication
- Subcutaneous fluids
- To-go-home pain medication
- E-collar
- Nail trim

Your cat's surgery does not include:

- Microchip

* The pre-surgical blood work should preferably be obtained by one of our technicians approximately one week before the scheduled surgery date to be certain all the values are OK for anesthesia and surgery. A time will be set up for you to have this done by one of our technicians.
